## **REPORT**

The Seminar was organized on 2<sup>nd</sup> January, 2019 on the topic “**.Net MVC Architecture**”, by Mr. Neeraj Agnihotri, Tops Technology. Dr. Manish Kayasth sir and other faculties also joined in the Seminar.

He had begun with the Comparison of .Net and PHP. He also discussed about architecture of .Net MVC. He talked about the MVC pattern that helps to create applications that separate the different aspects of the application (input logic, business logic, and UI logic), while providing a loose coupling between these elements. The pattern specifies where each kind of logic should be located in the application with theory and practical session and how it is utilized as buzzword.

Around 100 students of SYBCA and TYBCA actively participated in it. The content of the seminar was very useful and informative for their project as well.
